

Notes

The Client is to check and verify all boundary and site dimensions, levels and areas and to ensure that the information is correct and that the boundaries are correctly shown on the map. The Client is to ensure that the boundaries are correctly shown on the map. The Client is to ensure that the boundaries are correctly shown on the map.

These existing trees are to be retained if possible and to be protected by a tree preservation order (TPO) if necessary. The Client is to ensure that the boundaries are correctly shown on the map.

Utility Services Location Note
The survey has been carried out using a combination of observation and detection using identification of utility services. The Client is to ensure that the boundaries are correctly shown on the map.
